

Role: Service Engineer – Service Team

We're looking for an enthusiastic and driven individual to join our team. The Service Engineer will be responsible for installing, maintaining, and repairing our company's products and systems at customer sites. The ideal candidate will have strong technical expertise, excellent problem-solving skills, and a commitment to delivering exceptional service to our customers

Location: Based from our PPS Hull (Norman Walker) branch in North Ferriby, covering East Yorkshire, North Lincolnshire and North Yorkshire. Also expected to support our other branch regions from time to time (Yorkshire, Lancashire and Derbyshire).

Job type: Full time, permanent

Working pattern: Hours 8.30am – 5pm, Monday to Friday. Assist with call out support on a rota basis.

Salary: Competitive (available on interview)

Benefits:

- 25 days annual leave + bank holidays
- Company vehicle
- Mobile phone
- Workplace pension (matched up to 5%)
- Company healthcare – NHS top-up medical scheme
- Life assurance
- Learning and development opportunities

Essentials requirements:

- Full driving license required
- Ability to live and work in the UK

Skills required:

- Enthusiastic
- Mechanical and Electrical knowledge
- Organised
- Good communicator
- Team player
- Proactive and positive
- Good attention to detail
- Hard working
- Excellent problem solver

Key responsibilities:

- Perform preventative maintenance, troubleshoot and repair, and overhaul various types of compressors, dryers and ancillary equipment in a timely manner
- Ability to understand and adhere to manufacturer's instructions and/or company policies.

[key responsibilities continued]

- Must have an understanding of compressors, dryers and compressed air systems.
- Must be able to read, interpret and understand manufacturers' equipment manuals and drawings.
- Responsible for reporting daily updates of workload, additional work required, submitting accurate maintenance reports and ongoing events to the service team.
- Demonstrates proficiency in accurately and efficiently diagnosing and repairing mechanical problems on multiple compressor systems.
- Demonstrates a knowledge of compressor technologies and comprehensive mechanical and electrical diagnostic skills.
- Knowledge of energy saving systems is advantageous.
- Knowledge of control systems is advantageous.
- Dedicated to customer service and maintains professional working relationships with customers and coworkers.
- Liaise with customers on all levels.
- Complete job reports in electronic format.
- Instruct customers on how equipment works, how to use it safely, new features and suggest upgrades.
- Adhere to safety protocols and procedures while performing service activities, ensuring compliance with regulatory requirements and company policies.
- Document service activities accurately and comprehensively.
- Provide technical support and guidance to clients.
- Stay updated on product developments, industry regulations, and best practices to continuously improve technical knowledge and skills. Including attending training as requested by PPS.

Company overview:

Pennine Pneumatic Services Ltd is a specialist provider of compressed air systems - With branches strategically located across the north of England, we are one of the leading providers in the region. We pride ourselves on our commitment to high quality service and customer satisfaction.

Our company forms the Pneumatic Division of the R&G Fluid Power Group – This affiliation brings with it a wealth of resource, expertise, and opportunity for growth.

At PPS, we are committed to fostering an inclusive and diverse workplace. By joining us, you will become an integral part of a dynamic team that not only leads in delivering cutting-edge compressed air solutions but also prioritises safe, ethical, sustainable, and inclusive practices. Your skills and passion will contribute to our ongoing commitment to creating a workplace where everyone is valued, respected, and empowered to thrive.

So, what do we do...?

We supply: air compressors, vacuum pumps, low pressure blowers, nitrogen generators, chillers, HVAC equipment, pneumatic components, pipework and assembly tools.
